

# Health & Safety Policy

EPOSability believes that in order to be ensure long term sustainable success; the Health & Safety and wellbeing of our staff, our sub-contracts, our clients and those affected by our business is fundamental.

Where reasonably possible, EPOSability will conduct our business such that we eliminate, or minimise risk to our employees, contracted parties, visitors and others affected by our work activities. This is achieved through appropriate training, H&S inductions, toolbox talks, consultation with employees and sub-contractors in relation to H&S, encouragement of open communication and co-operation, appropriate review and issue of appropriate Method & Risk Statements and the issue & monitoring of PPE usage.

Our aim is to achieve continual improvement in relation to Health & Safety awareness. An example of recent improvements include the production and issue of H&S Brochure Guidelines to help ensure the compliance of sub-contracts working for EPOSability - with expected EPOSability operating procedures.

EPOSability undertakes quarterly audits to ensure the provision and maintenance of safe and healthy working environments, equipment and systems of working for all our workers. EPOSability only assigns competent individuals to undertake any works, with the provision of appropriate training and instruction where necessary.
